CUSTOM MANUFACTURING

TAG is a leading innovator in custom electrical & mechanical products. We excel in engineering & manufacturing precision products for telecommunications, computer & other industries.

TAG provides engineering services throughout all phases of the product life cycle to enhance the value of your product to the marketplace.

Competing in the market today, businesses are confronted with obstacles such as manufacturing inefficiencies, cost challenges, complex supply chain and engineering inadequacies. TAG can consolidate your engineering and manufacturing difficulties into a single source to provide rapid services to your company - from concept to prototype to full completion.

- ✓ TAG offers custom manufacturing on a **made-to-order** basis allowing you to meet your customer's demands.
