

CERTIFICATE OF USE IN ALCATEL 7300 ASAM

for

**TAG LP-UD Streaker Card  
(TAG p/n ST-ALC7300UD)**

**DATE:** November 6, 2003  
**TO:** TAG, Inc. (Telecom Assistance Group), Inc.  
**FROM:** ALCATEL FIXED NETWORKS DIVISION (Raleigh, North Carolina location)

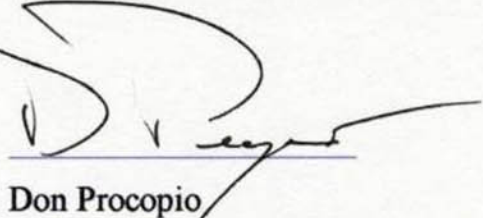

*Certificate of Use only covers ST-ALC7300UD streaker cards for use with 7300 ASAM LP-UD systems.*

Alcatel's Fixed Networks Division has satisfactorily reviewed and tested the equipment, data and documentation provided by TAG for its ST-ALC7300UD streaker cards for deployment in Alcatel's 7300 ASAM Low Profile - Ultra Density systems within the Licensed Channel Unit Program.

The ST-ALC7300UD card is used to verify POTS and xDSL wiring continuity from the ASAM system backplane to the Main Distribution Frame. As such, this streaker card is keyed for placement only in LP (Low-Pass) slots in the LP-UD shelf. Per our test process, the ST-ALC7300UD card does not adversely impact the Alcatel 7300 ASAM system.

Alcatel has also inspected TAG's documents and requires that the ST-ALC7300UD card only be used per TAG's ST-ALC7300UD Practice document # 3003575. This streaker card is available for purchase from TAG along with complete practice documentation.

Accordingly, TAG's ST-ALC7300UD streaker card is hereby certified for commercial deployment in for the Alcatel 7300 ASAM LP-UD system.
