

(1) STB-G6TPMDS1
G6 TPM Streaker / Test Board Combo
 for 10 DS1 Circuits
 (w/ LED's and Bantam Jacks)

Application:

The STB-G6TPMDS1 is a **combination** streaker and test board used in the TPM card slots of the General Bandwidth (G6) system.

As a "**Test Board**" - the STB-G6TPMDS1 provides Bantam Jack access to the 10 DS1 circuits of the TPM card slots. The STB-G6TPMDS1 is ideal for checking wire assignments and pretesting before G6 turn-up dates. With test equipment, a technician can quickly identify opens, shorts, crosses and transmit and receive T1 signals between the G6 and DSX-1.

As a "**Streaker**" - the STB-G6TPMDS1 also provides a quick method to "streak", verify wiring via LED's, from the General Bandwidth backplane to the DSX-1. At the DSX, simply ground the corresponding pins and the STB-G6TPMDS1 will light the LED associated with that connection.

(1) 400210RD
 Bantam to Bantam DS1 Test Cord (Tx) - Red, (6')

(1) P-2000
 Protected (-48V) Test Probe w/ LED, (6')
