

SLC Cabinet Testing Solutions

CLOSE THE DOOR ! ! !

Telecom Assistance Group (TAG) has designed a "Right Angle" test cord for "Patching" T1 circuits inside SLC Series 5 or SLC-96 cabinets. The "Right Angle" mold allows greater door clearance eliminating cord breakage, "bad connections" - patches, and the ability to CLOSE THE DOOR. This cord set allows technicians the ability to put a physical "hard loop" and shut the door at the Remote Terminal (RT). No worries about intruders, rain . . . while testing the route (apparatus cases) by yourself down the way.

* * * SLC-96 * * * We also have a "low profile" LIU test cord (see below)

Ordering Information:

400310R	Right Angle 310 to Right Angle 310, (2')	Call for Pricing
400210R	Right Angle Bantam to Right Angle Bantam, (18")	
400442FL	15 Pin D (female) to LIU plug "low profile", (8')	

150 Cooper Rd. (F-15)
W. Berlin, NJ 08091
