General Bandwidth

Application:

The STB-G6TPMDS1 is a *combination* streaker and test board used in the TPM card slots of the General Bandwidth (G6) system.

As a "**Test Board**" - the STB-G6TPMDS1 provides Bantam Jack access to the 10 DS1 circuits of the TPM card slots. The STB-G6TPMDS1 is ideal for checking wire assignments and pretesting before G6 turn-up dates. With test equipment, a technician can quickly identify opens, shorts, crosses and **transmit and receive T1 signals between the G6 and DSX-1**.

As a "**Streaker**" - the STB-G6TPMDS1 also provides a quick method to "streak", verify wiring via LEDs, from the General Bandwidth backplane to the DSX-1. At the DSX, simply ground the corresponding pins and the STB-G6TPMDS1 will light the LED associated with that connection.

Ordering Information:

STB-G6TPMDS1	**G6 TPM Streaker / Test Board Combo** for 10 DS1 Circuits *(w/ LEDs and Bantam Jacks)*	**Call for Pricing**
G6TPMKIT-01	**G6 Basic Streaker / Test Kit** includes: (1) STB-G6TPMDS1, (1) P-2000, (1) 400409 & (1) 600209XL	
G6TPMKIT-02	**G6 Standard Streaker / Test Kit** includes: (1) STB-G6TPMDS1, (1) 400210RD, (1) 400210BK, (1) 400210ARD, (1) 400210ABK, (1) P-2000, (1) 400409 & (1) 600209XL
