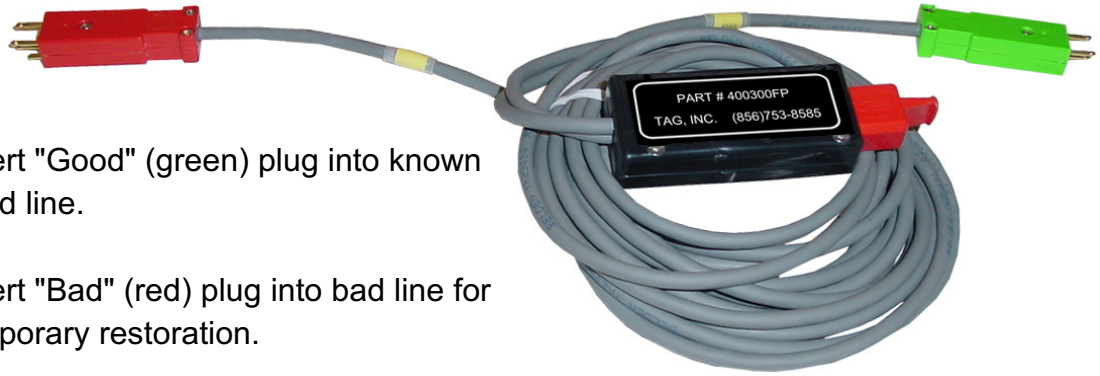
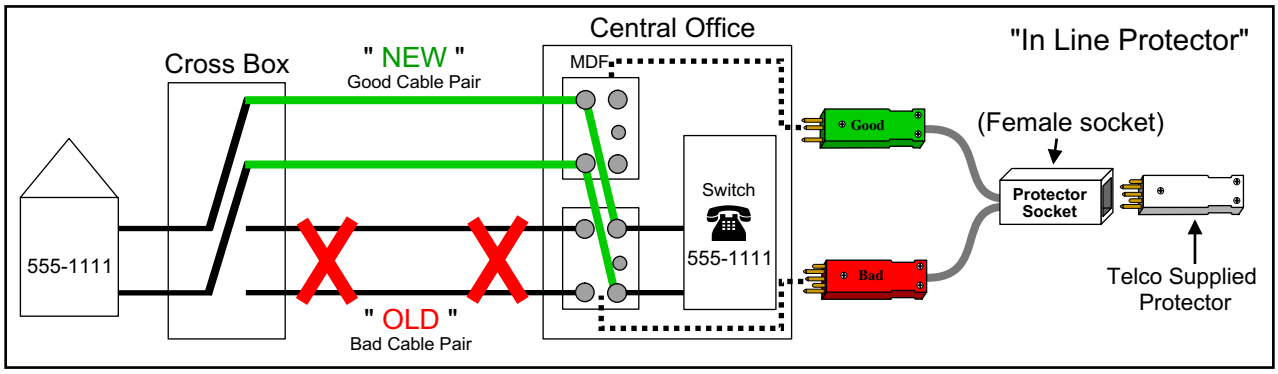
"Frogger" Protector Test Cord, (20')



1. Insert "Good" (green) plug into known good line.

2. Insert "Bad" (red) plug into bad line for temporary restoration.



Application:

TAG's Temporary Restoral Cord (400300FP) allows you to add protection back to the telephone line when testing. TAG's test cord features a built-in protector socket that accepts any 5-pin protector module. A 5-pin module with the same specifications as the line you are testing on must be inserted before the test cord can function. Once inserted, the cord will now function and protection has been restored to the line.

In the event of a power or lightning strike, TAG's 400300FP can save thousands of dollars by eliminating dangers that can destroy expensive equipment or possibly harm a technician. One plug is Green "GOOD" & the other plug is Red "BAD". When the repair is made, the circuit can be identified as to which pair is good or bad.
